
Per Capita Sales of Pharmaceuticals

2009 in USD (adjusted for purchasing power)

Sales in the pharmacy market at manufacturer prices; Switzerland 2008
Source: IMS Health, OECD, vfa

Germany ranks in the middle of an international comparison of per-capita sales (sales in the pharmacy market at manufacturer prices). Compared with other European countries, Germany lies behind France and Switzerland. In non-European industrial nations such as the USA, Japan and Canada, per capita sales are higher than those in Germany.
